blocked clause elimination 211
card game description language 161
cognitive modeling 31
comparison 71
comprehensibility 220
computational complexity 250
computational social choice 250
configuration checking 11
cooperation 141
Copeland elections 250
coronary heart disease 201
cup elections 250
data mining 71, 230
decision theory 21
defeasible reasoning 191
description logics 21, 191
dirichlet compound multinomial 290
dynamic Bayesian networks 201
exceptions 191
feature extraction 230
feature selection 290
game description language 161
general game playing 161
guiding paths 211
heuristic search 141
hidden Markov models (HMMs) 171
hidden semi-Markov models (HSMMs) 171
hybrid classifier 220
hybrid tree 220
information integration 111
inprocessing 211
interestingness measures 71
interference 181
knowledge acquisition 280
knowledge generation 111
knowledge representation 161, 280
learning 81
leverage 71
local optima 171
local search 41
machine learning 230, 280
margin of victory 250
Markov decision process 101
medical diagnostic models 201
metrics 270
metric sensitive 270
model comparison 290
model identification 171
multi-agent-based simulation 31
multi-objective 270
multi-objective learning 220
multicriteria decision making 21
multidisciplinary topics 31
naive Bayes model 290
narrowing 61
non-negative matrix factorization 181
nondeterminism 141
nonmonotonic reasoning 191
novelty heuristic 11
online games 230
open information extraction 111
optimal policy 101
optimisation 41
OWL 191
parallel algorithm 141
pattern selection 71
PCP-net 81
